

DESIGN CHALLENGE PROGRAM ANNOUNCEMENT

CALL FOR STUDENT DESIGN TEAMS

FALL 2014

NASA's Texas Space Grant Consortium WANTS YOU for the DESIGN CHALLENGE!

- Teams of up to 6 students work with a NASA Mentor
- Topics for the International Space Station, Mars and beyond

- Engineering, science and other disciplines welcome*
- Open to all undergraduate and graduate students*

- Teams eligible for more than \$1000 in funding*
- Final showcase presentation in Houston to NASA personnel
- Students compete for thousands of scholarship dollars*

* TSGC DESIGN CHALLENGE, sponsored by NASA and administered by the Texas Space Grant Consortium, is a unique academic experience offering students enrolled in engineering, science, and education-related programs an opportunity to propose and design a solution to a topic of importance to NASA and its mission. Teams are composed of students enrolled in a required course or approved for-credit independent study. One- or two-semester projects are available. Some projects have pre-requisite, academic major, or citizenship restrictions. Team funding is subject to regulations of NASA and your university, and is provided to offset the cost of project expenses and project-related travel, including travel and hotel for the final showcase presentation near NASA Johnson Space Center. Independent from team funding, students compete at the showcase event for scholarship dollars and other awards.

FALL 2014 APPLICATION DEADLINE: SEPTEMBER 12, 2014
