

AUBURN UNIVERSITY GRADUATE STUDIES IN PHYSICS

M.S. and Ph.D. Programs

Research Areas

- Atomic, Molecular, and Optical Physics
 - Ultrafast science
 - Collision dynamics
 - Spectroscopy
- Condensed Matter Physics
 - Molecular beam epitaxy
 - Wide bandgap devices
 - 2D materials
 - Electronic structure calculations
- Plasma Physics
 - 3D magnetic confinement
 - Complex plasmas
 - Plasma computational modeling
- Space Physics
 - Magnetosphere
 - Solar emissions
 - Satellite observations

Quick Facts

- Over 20 faculty and 60 graduate students with diverse backgrounds
- Financial support through Research or Teaching Assistantships, which include tuition waivers
- Personalized student mentorship
- Auburn is a vibrant college town, close to Atlanta, Birmingham, and Gulf Coast

Apply Now!

Review of applications will begin Jan. 15.
