

Pearson LearningStudio: Notifications – Knowledge Article

July 2015

Until this release, users had to login to LearningStudio to check the status of their activities. Now students can be alerted to course activities via text or on their mobile phone or up to two email addresses. Based on their preferences, students can automatically receive a push notification with every new: course announcement, threaded discussion post, grade, and/or assignment without having to login to the course. Enrolled students will automatically receive email notifications for announcements, and can opt out of this feature. To receive text notifications, students must opt in.

To begin setting up notifications, click on the bell-shaped “Notifications” icon at the top left row of icons.

Email Setup

Primary Email address: lucky.lion@leomail.tamuc.edu

Your primary email is the address your school has on file and cannot be changed here.

Additional address:

A confirmation email will be sent to the additional address. Instructions on how to activate notifications will be included in this email.

Please note that these notifications settings apply for all of your classes for this term. For certain categories of notifications, you can make changes at the class level after completing this initial configuration.

By default, the email address on file with the university will appear as the “Primary Email address”. **This cannot be changed in eCollege.** Additional email addresses may be added by clicking the “Add” button. Click the “Next” button when you are finished.

Your primary email is the address your school has on file and cannot be changed here.

Additional address:

A confirmation email will be sent to the additional address. Instructions on how to activate notifications will be included in this email.

Please note that these notifications settings apply for all of your classes for this term. For certain categories of notifications, you can make changes at the class level after completing this initial configuration.

Text message notifications are optional. If you choose to receive text notifications, select your country and carrier and enter your phone number. Be sure to enter your number without hyphens (-). Hit "save."

You should receive a verification code via text message to your cell phone. Enter this code, click "verify," and then "next".

The next page will allow you to customize which notifications you will receive, how often, and by which method (email or text).
