This is huge.

We have pushed our biggest update today, and you are going to love it.

Now your colleges can make changes that will be reflected almost immediately in the booth. By logging in to the existing college registration, ***updates to the virtual booth can be made at any time, up to and including fair date(s) and beyond***. The process runs every ten minutes, please allow that time before you refresh your booth page.

Simply log in to the existing college registration at any time to update your booth:

New videos and links can be posted immediately

New presentation schedules can be posted for each new fair date

New documents can be uploaded when needed

New details can be added to the 'about' description

Change the look/feel of your booth when fair date(s) are over

…and so much more.

This is a huge and important update to serve you and your colleges better.

We thank the little hamsters in the back office for running so hard on the wheel to make this happen!

Important Note:

*Because **leads and chat** are still assigned manually in our post registration process, we can't accept any changes to those fields after college registration closes. We will lock those fields in the registration form the day after your college registration closes so they cannot be updated. This will help colleges avoid inadvertently disconnecting those important functions.*
